SUMMARY

I am a Front-End Developer graduated from Nucamp's bootcamp, with proficiency in HTML5, modern CSS, JavaScript, and React. During my training, I developed practical projects that allowed me to apply concepts of responsive design, coding best practices, and API integration. My focus has always been on creating intuitive and functional user interfaces with clean and efficient code.

I am seeking an opportunity to apply my knowledge, contribute to the growth of an innovative company, and continue developing in the front-end field. I am dedicated, detail-oriented, and motivated to learn and evolve constantly.
