Front-End Developer

I'm a Front-End Developer with experience building modern, responsive, and high-performance user interfaces using React, HTML5, CSS3, and JavaScript. I specialize in integrating RESTful APIs and applying clean, scalable coding practices.

Currently focusing on enhancing my expertise in Next.js and TypeScript, I am committed to continuously learning and refining my skills. I'm driven by solving complex problems and delivering innovative, impactful solutions.

Shopping Cart

A modern and interactive shopping cart application built with React, featuring smooth state management, local storage persistence, and an intuitive UI design.

GitHub: github.com/gabriellamsa/shopping-cart

Purific Ar

A professional website developed for Purific Ar, a company specializing in air conditioning installation and maintenance. Built with React and Tailwind CSS, it features a modern, responsive design, an intuitive service booking system, and an optimized user experience.

GitHub: github.com/gabriellamsa/purific-ar

Nucamp Site

A campsite management application built with React and Redux, featuring booking functionality, user reviews, and detailed campsite information. Designed to be fully responsive with an engaging user interface for a seamless experience.
