Frontend React Developer

Front-End Developer with a passion for crafting elegant, responsive, and accessible web experiences. I build real-world projects using React, Next.js, Tailwind CSS, and TypeScript, focusing on clean code, user experience, and performance.

Currently diving deeper into Next.js 15 and React 19, I'm always learning and looking for opportunities to grow as a developer. Open to front-end roles where I can contribute and evolve in a collaborative environment.
